PPJ WEB WORLD'S ONLY SOLUTION TO CREATE HTML5 APPLICATIONS

from Unify/Gupta Applications

Benefit from the best RealTime Web Framework in the world - Wisej. Almost everything in migrated SAL applications can run on the Web Server and be used by any browser and any device.

PPJ Web is based on Wisej - our open Web Integrated Server Environment to design, build, debug, and manage RealTime Web Applications.

REGAIN YOUR ADVANTAGE

Your existing migrated applications can finally become true Web Applications without having to spend a fortune and risk failure by rewriting it from scratch.

With this amazing technology you can reuse migrated code, forms, and reports on a web server and give users a true Web Application that they can use on any device. Ready-made themes include Google Material design, FontAwesome icons and more.

KEY FEATURES

- Supports all forms and controls, including: Table Windows, Editable Combo Boxes, Ribbon, Tree Control, Tab Control, List View, Ribbon Bar, System Dialogs, MDI.
- Forms and Dialogs are designed in Visual Studio
- All forms and controls are themed
- One of the fastest RIA frameworks available today
- Compatible with Explorer, Firefox, Chrome, and Safari on Windows, Linux, and Mac OSX
- Optimized for Cloud environments as Windows Azure
- Employs the empty-client model for extreme security

LIVE DEMO AND WEBINAR

Schedule a live webinar or our web site to see the PPJ Web in action and ask any questions you have.

COST?

Less than the alternatives, including migrating to TD 5 or 6 and staying with SAL, a language designed in the previous century.

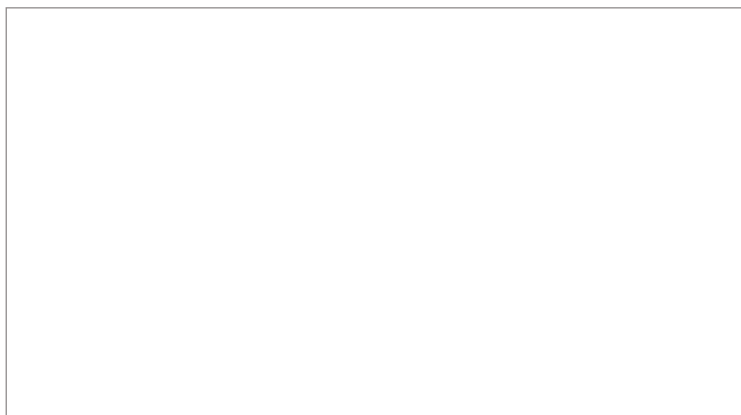

RISK?

Zero.

QUESTIONS?

We are available worldwide to answer any question you may have. We can arrange a personalized webinar for you and/or a meeting where we can show you a demo of your application migrated to .NET.

Visit www.iceteagroup.com for a Personalized Webinar.
