PPJ CLOUD WORLD'S ONLY SOLUTION TO RUN MIGRATED

Unify/Gupta Applications on the Cloud Using Web Services!
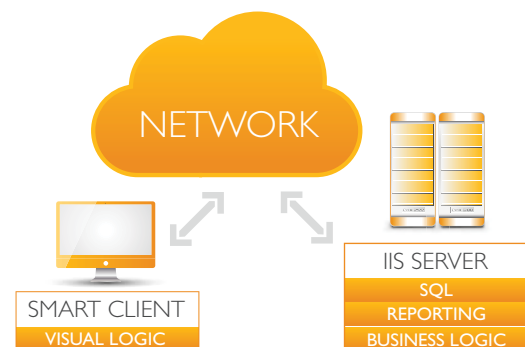

Porting Project

PPJ Cloud Services are based on the powerful Microsoft Communication Foundation (WFC). Migrated .NET applications can use this innovative technology to access data, generate reports, and execute business logic code on remote servers across the internet or intranet.

DEPLOY YOUR APPLICATIONS ANYWHERE

Using PPJ Cloud™ Services you can package and deploy traditional client server applications remotely to anyone on a Windows machine. You don't have to deploy huge runtimes, database drivers or reporting engines, and don't have to open connections to the database.

Replace Citrix or Remote Desktop and deploy smart client applications anywhere.

The system generates optimized Web Service calls that are transported to the PPJ Cloud™ Server by WCF (standalone or hosted in IIS), and executed in the safe and reliable .NET platform.

KEY FEATURES

- Built-in Security
- Light deployment: Smart Client, Click-Once, XBAP
- Virtualized Applications for locked down PCs
- No Database Drivers on the client (Oracle Instant Client is 200MB!)
- No Reporting Engine on the client (Crystal Report .NET is 100MB!)
- Server Side Custom Handlers for customized logic
- Centralized Management of resources
- Supported reporting engines: Crystal Reports.NET, Microsoft Reporting Services, Combit List & Label, Stimulsoft
- Supported databases: All ADO.NET providers, including Oracle PL/SQL calls with arrays

LIVE DEMO AND WEBINAR

Schedule a live webinar or our web site to see the PPJ Cloud™ in action and ask any questions you may have.

COST?

Less than the alternatives, including migrating to TD 5 or 6 and staying with SAL, a language designed in the previous century.
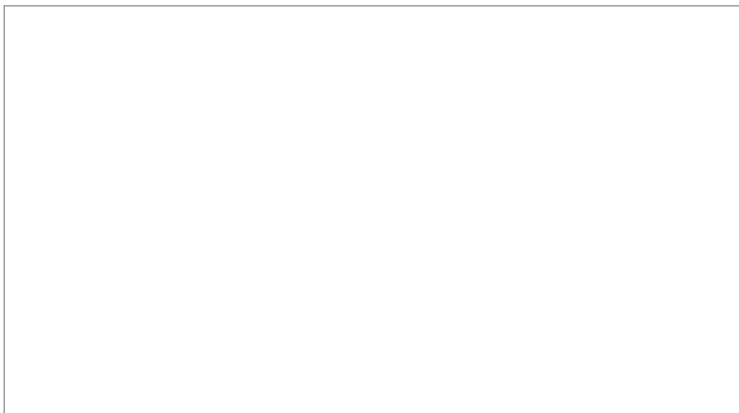

RISK?

Zero.

QUESTIONS?

We are available worldwide to answer any question you may have. We can arrange a personalized webinar for you and/or a meeting where we can show you a demo of your application migrated to .NET.

Visit **www.iceteagroup.com** for a Personalized Webinar.
